## Model 8877 Jack Alignment Kit\* (Faster and More Convenient Tripod Jack Positioning)

\*patent pending

**Model 8877 is suitable for all narrow and wide body tripod jacks.** The unit projects a laser beam (with cross hair) for easy alignment of the jack and the aircraft jack point. The tool is especially useful for tall tripod jacks where it is difficult to simultaneously level and position the jack under the aircraft jack point.

Simply place the tool on the jack, turn on the laser beam, level and position the jack under the aircraft. The kit includes two adapters for standard tripod jacks. (An optional adapter is available for 747 aft tripod jacks.)

### Model 8877 includes:

- Rugged lightweight storage and carrying case with foam cushioning
- Durable housing with rechargeable battery, on-off switch, battery status light, electronic card with programmed logic for operation and charging.
- Plug-in battery charging power supply (100-240V, 50-60Hz input power) and international plug adapters.
- Jack adapters (for std. 3/4 spherical and 1 1/4 inch spherical radius fittings). The case includes space for the optional 747 aft jack adapter.
- Automatic turn-off, about twenty minutes, to prevent unnecessary discharge of the battery.
- Operating instructions

## Specifications:

### Model 8877:

Kit Weight (approximately):

3 lbs. (1.4 kg.)

Size (approximately):

9.50 x 8.75 x 5.00 inches (241 x 222 x 127 mm)

Battery:

3.6 volt pack (rechargeable NiMH)

Input Power:

100 - 240 Volts, 50 - 60 Hz

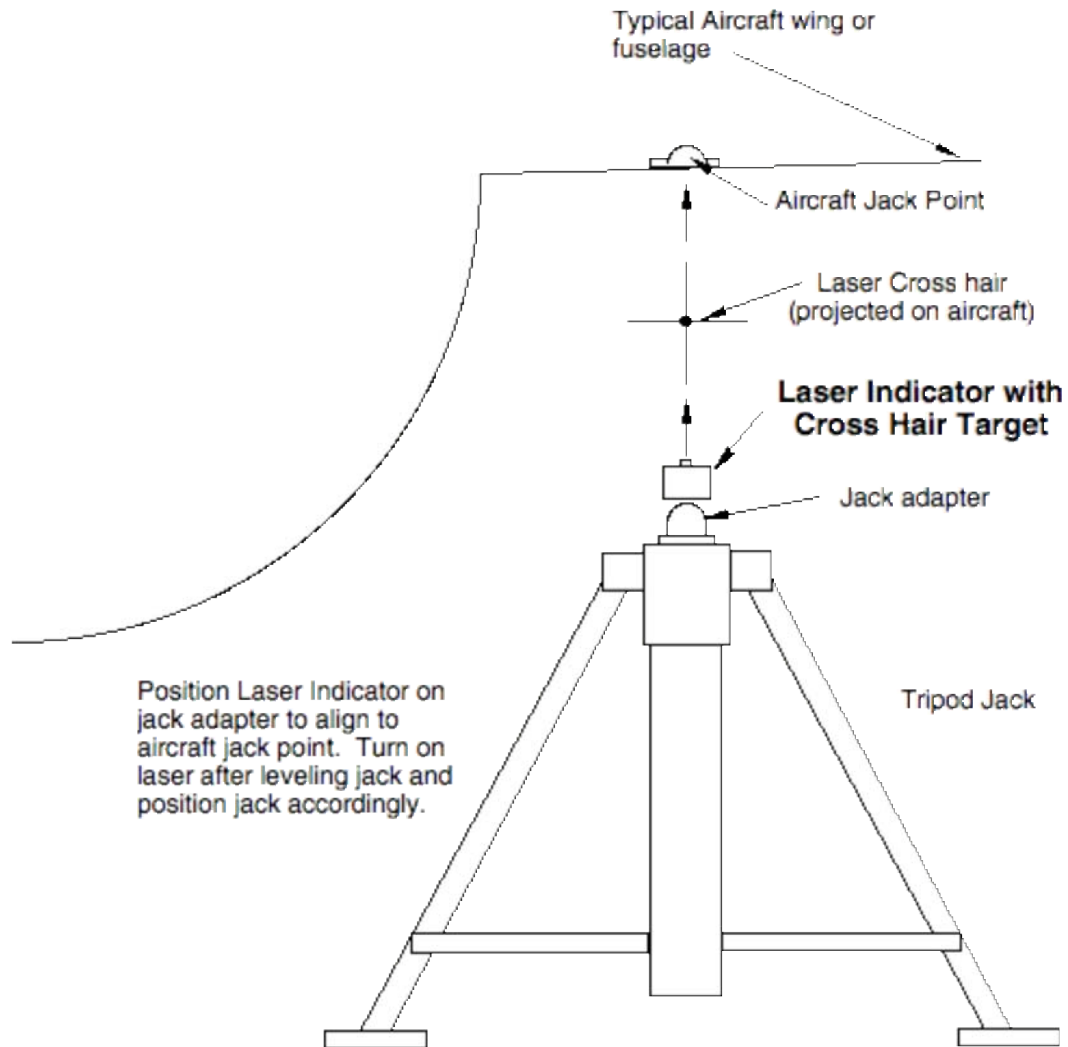

### Shipping Data:

Size:

12.00 x 9.00 x 7.00 inches (305 x 229 x 178 mm)

Weight:

4 lbs. (1.8 kg.)
